Coronavirus and The Changes in Events

Europe and the US are facing new round of shutdowns amid virus surges. A new wave of lockdowns is taking place in France, Germany, Switzerland, Italy, Bulgaria, and Greece. Night spots, restaurants, bars, and theaters are included in the lockdown. These countries are imposing restrictions such as mandatory masking-wearing and curfews. This action is to help prevent an acute national health emergency.

Madrid and other parts of Spain have banned all but essential travel in and out of their regions. In the U.S., practically every state is seeing a rise in coronavirus cases. The long-feared surge is blamed in part on growing disregard for social distancing and mask-wearing, as well as the onset of cold weather, which is forcing people indoors, where the virus can spread more easily.

In the U.S., more than 71,000 people a day are testing positive on average, up from 51,000 two weeks ago. Cases are on the rise in all but two states, Hawaii and Delaware, and deaths are climbing in 39 states, with an average of 805 people dying in the U.S. per day, up from 714 two weeks ago.
